School Information Systems, Inc. Announces Partnership with Scantron®

Helping school districts maximize student performance.

St. Louis, MO (April 21, 2008) – Teaching without assessment can be like shooting in the dark. SIS, Inc. has partnered with Scantron to help school districts shed light on the process of measuring and raising student achievement.

Scantron's assessment solutions allow immediate, accurate and reliable capture of student performance data necessary to impact instruction and inform leadership. Combining traditional formative assessment with computer adaptive testing, Scantron uses one online platform to create a comprehensive assessment program that provides educators with the data necessary to improve student achievement, as well as meet NCLB requirements.

For more information on the new offering from SIS, Inc. and Scantron, visit www.sisk12.com or phone SIS, Inc. at 888-445-8503.
